Guide to the Interpretation of Course Evaluations at UT Austin

The goal of course evaluation process at UT Austin is to drive teaching excellence and to support continuous improvement in teaching and learning experiences. The two sets of scales used for core evaluation questions and the associated weights are:

Strongly Agree (5)

Agree (4)

Neutral (3)

Disagree (2)

Strongly Disagree (1)

Excellent (5)

Very Good (4)

Satisfactory (3)

Unsatisfactory (2)

Very Unsatisfactory (1)

The Mean is calculated by adding all of the weights for a single question and dividing by the number of respondents. The course workload question is not averaged.

The number of students (e.g. respondents) marking each option is reported for each of the items. These frequency distributions provide information about the level of student ratings and the spread and shape of the class distribution of responses. The distributions thus provide a picture of student perception of a course.

Course evaluations provide snapshots of student perspectives on their course-level learning experiences. Most experts on teaching evaluation advise that no individual method gives the complete picture of an instructor's teaching effectiveness; multiple and diverse measures, on multiple occasions, are advised to give a full picture of the teaching effectiveness of a particular instructor. Moreover, other factors, such as size of class, level of the class, and content of the course, can cause small variations in the ratings. Therefore, student perspectives for a particular instructor or course should be interpreted as a snapshot, and not as providing complete information on the teaching effectiveness of that instructor.

Teaching Assistant Questions

The TA was available to help me as needed.

Statistics	Value
Mean	4.93

I felt the TA was approachable.

Statistics	Value
Mean	4.93

The TA explained course concepts, subject matter, or other course-related topics in a way that helped me learn.

Statistics	Value
Mean	4.80

The TA was able to address most of my questions related to the course concepts, subject -matter, or topics.

Statistics	Value
Mean	4.80

The TA communicated course content and subject matter with accuracy.

The TA communicated course expectations and instructions clearly.

The TA appeared engaged throughout the course experience.

Comment Questions

Identify aspects of your interactions with your teaching assistant that were most effective in helping your learning.

Comments
Maria cleared up many questions during the teaching sessions.
asking questions to lead us to answers so that we could find intuition on our own, explaining things in ways unique to the professor, helpful feedback on Psets
She provides clear explanations to questions, and her recitation really helps to enhance my understanding of the course.
Her knowledge of the subject is naturally very refined so she doesn't run in to too many problems with not knowing niche subtopics.
I found TA session helpful.
She is professional!

What is one thing the teaching assistant could do differently to help improve future students' learning in this course?

Comments
n/a
nothing!!
Connect a little more with the lecture material. Sometimes the process the TA uses is different from the process the instructor uses and that can cause an extra learning curve to overcome.
I wish the lecture materials were shared in advance.
